## LANGUAGES

- German — Basic
- English — Basic
- French — Upper Intermediate

## INTERESTS

- Swimming
- History, geography and cultural discovery
- Reading and continuous learning
- Technology and software development

## QUALITIES

- Continuous learner
- Team spirit
- Adaptable and organized
- Analytical and problem-solving mindset
- Curious and motivated
- Autonomous and responsible

# Full-Stack Web Developer

Recently graduated Full-Stack Web Developer in Computer Science, Software Engineering track, from Université Adventiste Zurcher.

I have hands-on experience designing and developing Web and mobile applications with Angular, React, Next.js, Node.js, NestJS, TypeScript and Python.

My final-year project, AllMada, is a Malagasy e-commerce marketplace made up of a Web application, a mobile application and a shared backend. I worked on REST APIs, authentication, and the management of users, shops, products, orders and payments, as well as on MongoDB, Docker and Git/GitHub.

## PROFESSIONAL EXPERIENCE

### Full-Stack Developer – Final-Year Project

*Université Adventiste Zurcher (UAZ)* — *December 2025 – June 2026*

- Final-year project – AllMada, a Malagasy Web and mobile e-commerce marketplace.
- Design and development of a Web application with Angular and a mobile application with Android Studio/Kotlin.
- Development of a shared backend with NestJS and creation of REST APIs.
- Management of users, shops, products, orders and payments.
- Implementation of dual administration: global platform administration and dedicated vendor spaces.
- Use of MongoDB, Docker, Docker Compose, Stripe and Git/GitHub.
- Application of Agile/Scrum principles and UML design.

## EDUCATION

### Bachelor's Degree in Computer Science

*Université Adventiste Zurcher* — *2023 – 2026*

University degree in Computer Science, Software Engineering track, with a focus on the design, development and implementation of software solutions. This program gave me an understanding of the different stages of the application development lifecycle, from analysis and design through to implementation and testing. I developed practical skills in Web and mobile development, REST API design, database management, and the development of solutions incorporating artificial intelligence technologies. As part of my studies, I also completed several practical projects, including a Web and mobile e-commerce marketplace, a voice recognition application and an image processing application.

*Bachelor's Degree — Software Engineering*

## SKILLS

- **Methods:** Agile, Scrum, sprint-based work
- **Design:** UML, Visual Paradigm, Figma, UI/UX
- **DevOps & Tools:** Git, GitHub, Docker, Docker Compose, Swagger, VS Code, Android Studio
- **AI & Data:** Python, PyTorch, SpeechBrain, speech recognition, image processing, KNN
- **Mobile:** Android, Kotlin, Jetpack Compose, Retrofit, React Native, Expo
- **Databases:** MongoDB, SQL, PostgreSQL, data design and management
- **Backend:** Node.js, NestJS, PHP, Laravel, C#, REST API, authentication
- **Frontend:** HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Angular, Vue.js, Tailwind CSS
- **Full-Stack Development**
- **Web Application Development**
